Hi Miranda,

This spreadsheet also contains 30 day low flows.

I thought there was a version that also had 30-day flows in it...I will keep digging.

Subject: FW: Discuss Bacti Calcs

A spreadsheet containing TMDL calcs based on annual mean flow. There was some discussion on what flow value to use.

Where: Dave's office since he will be gone

Hi Folks,

A meeting to discuss the draft (maybe even quasi-final) bacteria TMDL calculations for the Deschutes. As you might have guessed – I have a spreadsheet – that we can dig into. I have received preliminary feedback from Ecology (Nuri and Andrew) and want to confirm our thoughts before moving forward.

Dave, **Ex. 6 Personal Privacy (PP)** In the interest of keeping this rolling, might it be ok to meet without you next week -- keeping in mind there should be multiple opportunities in the future for you to weigh in before the numbers hit the streets?

Thanks,

Chris
